

## **Audrey is perfect for breakfast at Tiffany's** Introducing the ultimate laptop bag for busy and stylish women

Bellingham, Washington (March 1, 2006) – You don't dress like an accountant... so why carry a bag that makes you look like one?

Gudi proudly presents Audrey: the most stylish computer bag ever made. That's right. There's no earthly reason why a laptop bag can't be both practical and utterly gorgeous at the same time... just like you.

The Audrey is crafted from the finest Italian leather and hand stitched for a finish that's as elegant as your outfit. With plenty of space and a strategic padded compartment to protect your computer, Audrey makes a stunning statement. She says: "I'm busy, I'm confident, I'm sharp... but I'm a woman too." And so much more attractive than unzipping a laptop from some average nylon bag with a faceless computer logo stitched on its front.

And when you're not taking your computer out to play, Audrey makes the perfect handbag with an irresistible Porsche Red nylon lining and stylish loop handles. It's truly a bag for all seasons... and reasons.

So, if you think it's time to dump that drab old computer bag and trade up to something that will make you feel more stylish and confident, visit [www.gudibags.com](http://www.gudibags.com) for more information. Audrey can be yours for \$349.
